
Uncertain Future: Climate Change and Its Effects on Puget Sound – Foundation Document

Errata: Foundation Document

February 13, 2007

The Climate Impacts Group has issued the following minor corrections to the report *Uncertain Future: Climate Change and Its Effects on Puget Sound – Foundation Document*

- Table 1, USGS gages in Puget Sound drainages (p. 10): The period of record for the Nooksack River should be 1935-2003.
- Figure 12, Rates of sea level rise relative to the global average (p. 14): The caption for Figure 12 should read

“Vertical land movements in western Washington. Uplift (+) and subsidence (-) in millimeters per year. (Canning 1991; modified from Shipman 1989 and Holdahl et al. 1989).”
